

## **BRAINCO**

### LAUGH-O-MATIC

(ANNOUNCER IS LAUGHING, HE TAKES OFF HIS HAT AND STOPS LAUGHING)

Would you like to be able to laugh like that? Not a care in the world? Let problems roll off your back like water on your back? Well...you can! Don't be a sourpuss, a 'down-in-the-mouth,' a sad sack, a party pooper or a gloomy gus. Smile! Get happy! Cause Brainco, the company that brought you the Electro-Brain and The Gender Blender, brings you the Laugh-O-Matic!! (Announcer puts on hat, laughs and takes off hat). Yes, this goofy hat is really an advanced scientific breakthrough. It stimulates endorphin production-the laughter hormone-by tickling the brain's humor center. It's easy! Just put on the hat (He does and begins to intersperse laughing with the hat on then taking the hat off and showing a neutral expression.)
